

LED Surface Mounts for Bright, General Illumination From A Small, Sleek Style. Indoor or Outdoor with 75% Energy Savings and Lasts 40 Times Longer.

Finally, a fresh, modern approach to the old fashioned close-to-ceiling surface mount lights ideal for circulation spaces, living spaces and wet locations. This contemporary Micro LED Close-to-Ceiling fixture with a matte white body and a translucent white acrylic diffuser mounts simply to a standard 4 inch J-box and is less than 2" deep in a crisp, flat edged style that provides a sophisticated look. Rethinking Lighting in the LED Revolution allows a large amount of light for general illumination from small unobtrusive sizes that will beautifully blend into every application, indoor or outdoors. A warm, modern white 3000K color temperature is under 15 watts and illuminates like the output of 50W Par 20 and 75W BR30. Retrofit to an existing recessed 6" white can with a simple recessed accessory.

These Micro LED Close-to-Ceiling fixtures are a particularly good solution in wet location applications where normally a much larger and usually simple utilitarian look is used like in outdoor breezeways and shower/bathroom applications. They are also stylish substitutes for recessed downlights especially where ceiling obstructions or codes make a surface mount a good solution. It is ideal for applications that require expensive fire rated boxes for recessed fixtures since these mount simply to a surface mounted junction box.

Ideal Applications

Outdoor Breezeways

Since the CTCE Series are wet location rated and less than 15 watt, they are ideal for long, outdoor breezeways.

Replace Expensive Downlights

Fire Rated Recessed Housing
Avoid expensive Fire Rated Recessed housing by using the CTCE series in a standard 4" Junction box with bright, comfortable lighting at budget pricing.

Showers / Wet Locations

Add less than 15 watts to your shower or tub but lots of light that will make a difference in how good you look
