Reflector Retrofit Kit for Strip Fixtures

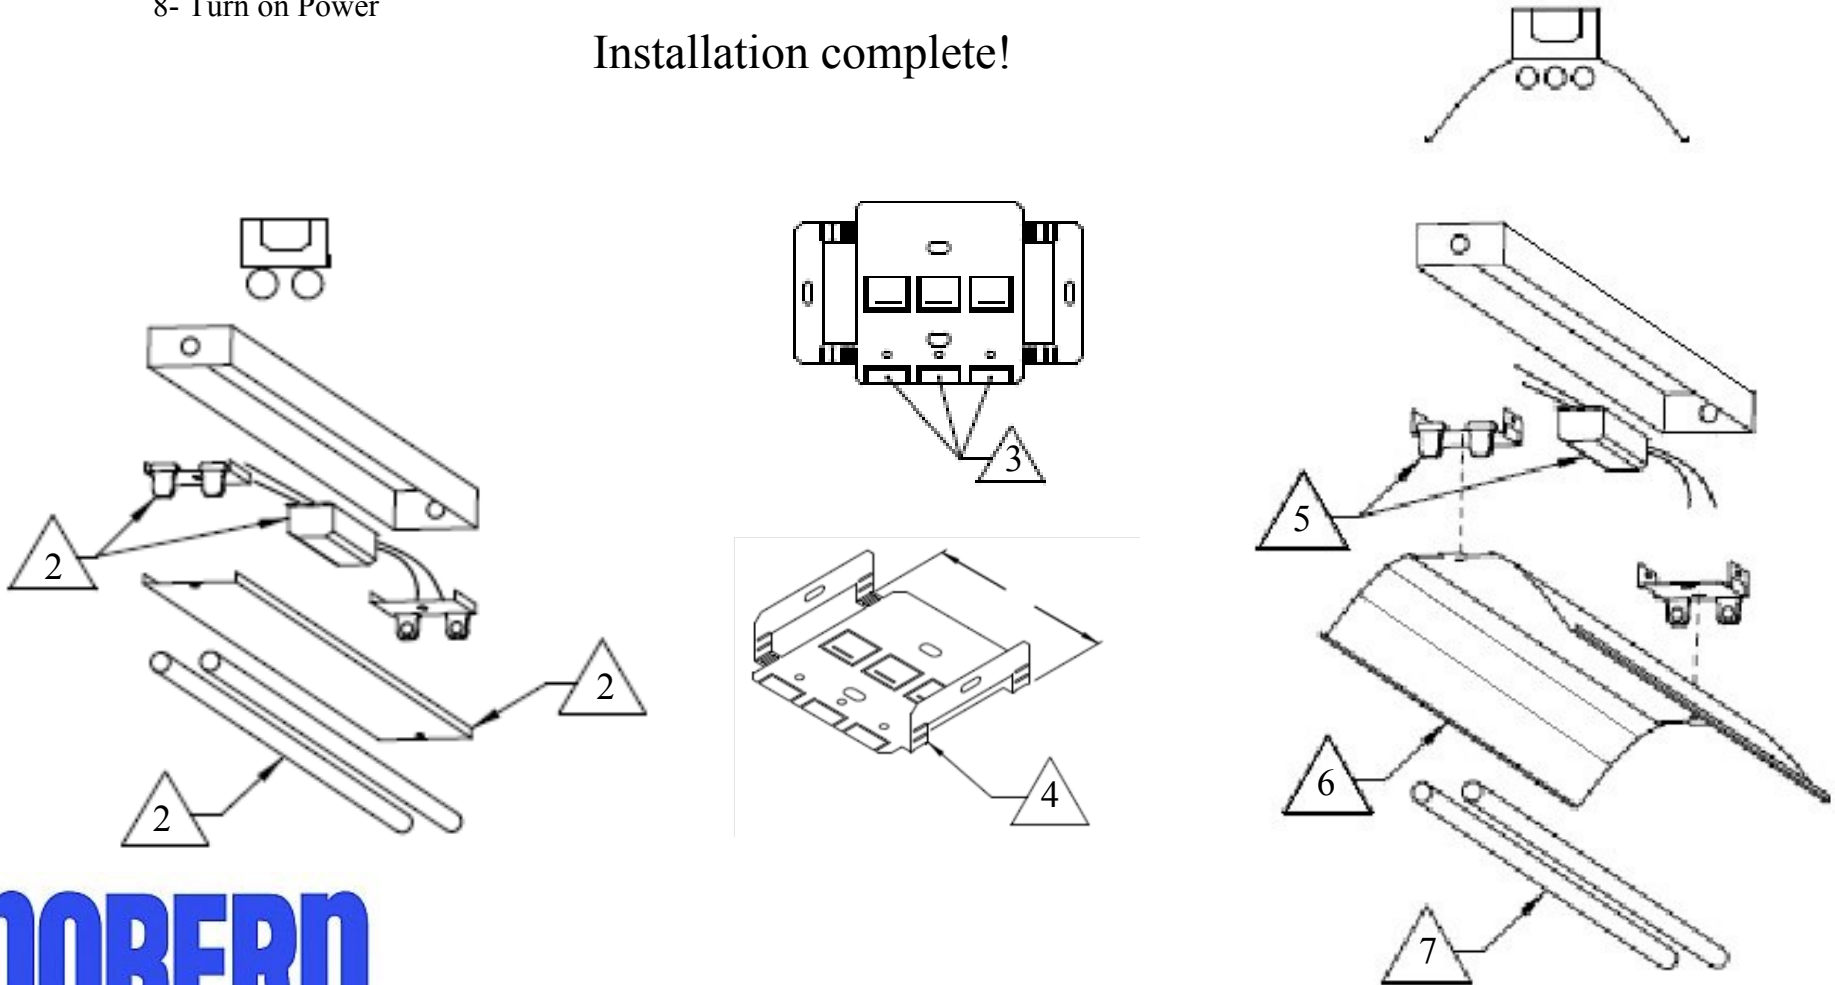

It's about the Savings and Quality of Light

Reflector Retrofit Kit for Strip Fixtures

Easy install-

- 1- **Turn off Power**
- 2- Remove existing lamps, ballast cover, ballasts, sockets and socket bars— Dispose of properly!
- 3- Break out tabs for end (and center socket(s) for 8 foot strips) depending upon lamp configuration specified
- 4- Bend tabs to fit channel— install sockets
- 5- Install new ballast— connect new sockets and power feed to ballast- screw socket plate to channel housing
- 6- Remove protective film from reflector and install with included clips
- 7- Install new lamps
- 8- Turn on Power

Installation complete!
