## Step 1 - Identification and Preparation

**MOBERN**  
LIGHTING

### A. Identify Fixtures

- Use labels found on the box and inside the fixture bodies to identify bodies.
- **NOTE:** Locations of labels can vary.
- Remove all fixtures from their boxes.
- Organize fixtures based on their labels at the install location.

#### Kitted Hardware

- Mobern has provided the items listed here, with their Saylite part numbers listed. These items can be found in separate boxes shipped with the fixture.
- Ensure all parts are accounted for and set them aside until needed.
- Any additional hardware needed for this installation will be provided by others.

### B. Tools Needed

Flathead  
Screwdriver

Safety Glasses

Drill

- Always use proper safety equipment when installing fixtures.
- Tools shown are recommended for standard install. Tools needed may vary based on actual install location conditions.

# AALB Installation Instructions

## Step 2 - Mounting and Suspension

### Mounting

#### Drywall or other hard surfaces - HC 801 Hanging Kit\*

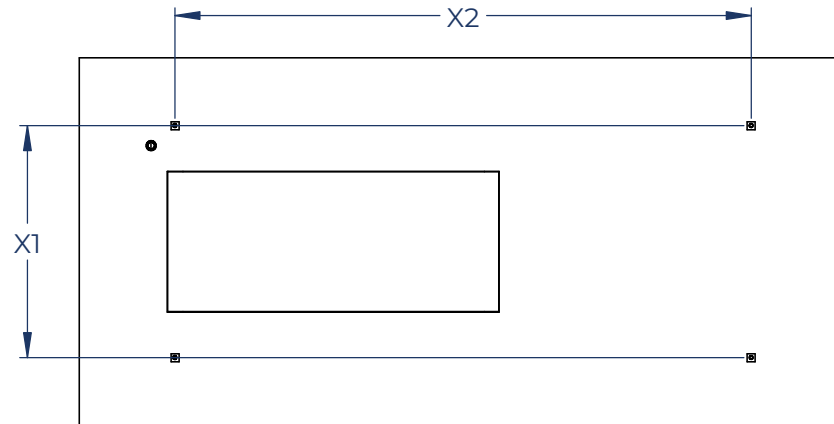

- Install hanging kits at suspension locations.
- Ensure hanging kits are secure.
- Prepare fixture for mounting.

Other hard surfaces include: wood, sheet metal panels, steel beams, concrete or masonry. Use hardware appropriate for each surface and material type.

### Suspension Locations

**X** = Suspension Dimensions

Refer to Assembly Drawings and building plans to determine exact mounting, suspension points, and power feed locations.

# AALB Installation Instructions

## Step 3 - Prepare for Installation

**MOBERN**  
LIGHTING

### A. Transfer Measurements

- Record the dimensions between the hanging points and transfer to the mounting surface.
- Verify the dimensions shown before proceeding to the next step.

### B. Install Hanging Kits

- Install the hanging kits at the desired mounting location, ensure the hanging kits are spaced according to the previously recorded measurements.

## Step 4 - Hang and Power Fixture

### A. Hang the Fixture

- Install the threaded ends of the hanging cable to the studs of the fixture.
- Use pliers or equivalent to tighten the threaded ends 1/4 turn.
- Adjust the lengths of the front and back cables to achieve desired angle for fixture. Snip excess aircraft cable.

### B. Power the Fixture

WIRING LEGEND		
BLACK	HOT	Line Voltage
WHITE	NEUTRAL	Line Voltage
GREEN	GROUND	
GRAY	DIMMING	0-10V DC
VIOLET	DIMMING	0-10V DC

- Wire fixtures to the incoming power supply using the provided quick disconnect clip as shown.
- For dimming option, refer to wiring legend above.
- Use UL approved connectors only. Follow all local, state and national codes.
- Installation is now complete.
