APPLICATIONS

This unique LED Retrofit Kits is an energy efficient, easy to install solution to upgrade your fluorescent troffer to LED. Compatible with both standard and narrow T-grids, it offers a simple retrofit that will improve the look of your ceiling with its architectural styling without the need to actually break the ceiling plenum. This kit offers a true Indirect/Direct solution that not only provides more energy efficiency but also the true comfortable performance of an indirect/direct fixture designed especially for workspaces with CRTs. The main diffuser and slanted troffer help reduce glare and create a pleasant, uniform throw of light. With this kit, you will get the energy savings and performance of the latest technology without the fuss and mess of changing out fixtures completely.

The RKDIS retrofit kit is a great upgrade solution for fluorescent troffers to LED. The kit provides a stylish architectural look without breaking the ceiling plenum, also provides a more efficient solution with greater energy savings and performance of the latest technology without the fuss and mess of changing out fixtures completely.

RKDIS 24 Series

FEATURES & BENEFITS

- Constant current LED drive programmable
- Input voltage 120-277V
- _cETL_{us} recognized as retrofit
- 0-10V Dimmable
- 5 year warranty
- THD <10%
- PF >0.95
- Min CRI 82

Dimensions and specifications subject to change without notice.
